

# COMBUSTION AND EXPLOSION [GORENIE I VZRYV (MOSKVA)]

Vol. 8 No.1 Year 2015

Editor-in-Chief and Chair of Editorial Council Professor S. M. Frolov

## In this issue:

Initial stages of acetylene pyrolysis. Formation of vinylacetylene <i>I. V. Biler, Yu. A. Borisov, and Yu. A. Kolbanovskii</i> . . . . .	5
Detailed kinetic mechanism of oxidation and combustion of iso-pentane and iso-hexane <i>B. Ya. Basevich, A. A. Belyaev, S. N. Medvedev, V. S. Posvyanskii, and S. M. Frolov</i> . . . . .	12
Detailed and global kinetic mechanisms for surrogate fuel <i>B. Ya. Basevich, A. A. Belyaev, S. N. Medvedev, V. S. Posvyanskii, and S. M. Frolov</i> . . . . .	21
Database for calculating laminar and turbulent combustion of aviation kerosene – air mixtures <i>A. A. Belyaev, V. Ya. Basevich, and S. M. Frolov</i> . . . . .	29
Basic model of combustion of a mixture of hydrocarbons and its parametric analysis <i>V. I. Bykov and S. B. Tsybenova</i> . . . . .	37
Experimental investigation of self-ignition of binary methane mixtures with C <sub>3</sub> –C <sub>5</sub> alkane additives in air <i>K. Ya. Troshin, A. V. Nikitin, A. A. Borisov, and V. S. Arutyunov</i> . . . . .	42
Surface burning in a volumetric foam metal matrix with the ceramic coating <i>V. M. Nikolaev and V. M. Shmelev</i> . . . . .	50
Combustion surface limits for a volumetric foam metal matrix with ceramic coating <i>N. Ya. Vasilik, V. S. Arutyunov, A. A. Zakharov, and V. M. Shmelev</i> . . . . .	57
Radiation efficiency and ecological safety of infrared metal foam burners with ceramic coatings <i>N. Ya. Vasilik and V. M. Shmelev</i> . . . . .	63
New processes for low-tonnage conversion of hydrocarbon gases <i>V. S. Arutyunov, V. I. Savchenko, V. M. Shmelev, I. V. Sedov, O. V. Shapovalova, I. G. Fokin, A. V. Nikitin, L. N. Strekova, A. I. Tarasov, A. S. Dmitruk, and K. A. Timofeev</i> . . . . .	71
Unified kinetic model of soot formation during pyrolysis and oxidation of aliphatic and aromatic hydrocarbons in shock waves <i>G. L. Agafonov, I. V. Biler, P. A. Vlasov, I. V. Zhil'tsova, Yu. A. Kolbanovskii, V. N. Smirnov, and A. M. Tereza</i> . . . . .	80

Homogeneous pyrolysis of <i>n</i> -pentane under pulsed adiabatic compression <i>I. V. Bilera</i> . . . . .	89
Investigation of combustion and pollutant formation processes in cylinder of a high-speed diesel engine based on a three-dimensional model of the working process <i>S. S. Sergeev and R. Z. Kavtaradze</i> . . . . .	97
On the possibility of determining the structure and rate of gas flow in the rapid compression machine by analysis of the motion of burning particles <i>V. V. Leschevich, O. G. Penyazkov, and S. Yu. Shimchenko</i> . . . . .	106
Computations of flow in a model high-speed combustor using different kinetic schemes <i>V. V. Vlasenko and A. A. Shiryayeva</i> . . . . .	116
Simulation of flow in a high-speed combustor in two- and three-dimensional formulation <i>S. M. Frolov, A. E. Zangiev, I. V. Semenov, V. V. Vlasenko, O. V. Voloshchenko, A. A. Nikolaev, and A. A. Shiryayeva</i> . . . . .	126
Approximate method of calculation of chemically reacting gas mixtures of detonation products <i>V. A. Shargatov, S. A. Gubin, and A. V. Krivosheev</i> . . . . .	136
Pulsating detonation wave investigation using shock-capturing methods and calculations in shock-attached frame <i>A. Lopato and P. Utkin</i> . . . . .	145
Experimental studies of small samples bench rocket engine with a continuously-detonation combustors <i>S. M. Frolov, V. S. Aksenov, P. A. Gusev, V. S. Ivanov, S. N. Medvedev, and I. O. Shamshin</i> . . . . .	151
Prediction ability of reaction mechanisms for modeling of continuously rotating detonation in propane–air mixture <i>D. I. Babushenko, V. I. Kopchenov, N. S. Titova, and A. M. Starik</i> . . . . .	164
Parametric study of the influence of nozzle on thrust performance of continuous-detonation combustion chamber <i>A. V. Dubrovskii, V. S. Ivanov, and S. M. Frolov</i> . . . . .	173
The multicomponent version of HMSA closure for CO <sub>2</sub> , N <sub>2</sub> , and O <sub>2</sub> shock Hugoniot simulation <i>A. A. Anikeev, Yu. A. Bogdanova, and S. A. Gubin</i> . . . . .	183
Calculation of shock Hugoniot for H <sub>2</sub> and D <sub>2</sub> based on the theoretical equation-of-state model <i>Yu. A. Bogdanova, S. A. Gubin, and A. A. Anikeev</i> . . . . .	190
Approximation of the thermodynamic properties of ammonia <i>A. V. Dubrovskii, N. M. Kuznetsov, and S. M. Frolov</i> . . . . .	198
Approximation of the thermodynamic properties of acetylene <i>A. V. Dubrovskii, N. M. Kuznetsov, and S. M. Frolov</i> . . . . .	215
