

# COMBUSTION AND EXPLOSION [GORENIE I VZRYV (MOSKVA)]

Vol. 10 No. 4 Year 2017

Editor-in-Chief S. M. Frolov

## In this issue:

Dynamics of pressure variation during autoignition and forced ignition of gasoline/air mixture in the adiabatic compression machine M. S. Assad, O. G. Penyazkov, and I. N. Tarasenko . . . . .	4
Numerical study of turbulent homogeneous combustion of methane/air mixture in a low-emission combustor by Reynolds-averaged Navier–Stokes and large eddy simulation methods A. B. Lebedev, P. D. Toktaliev, and K. Ya. Yakubovsky . . . . .	8
Regimes of supersonic flame propagation in channels and criteria of their realization A. D. Kiverin, I. S. Yakovenko, and M. F. Ivanov . . . . .	17
Firing tests of continuous-detonation rocket engine operating on natural gas and oxygen S. M. Frolov, V. S. Aksenov, V. S. Ivanov, S. N. Medvedev, I. O. Shamshin, N. N. Yakovlev, and I. I. Kostenko . . . . .	23
Modeling of flameless combustion of large droplets of normal and isomerized hydrocarbons in microgravity conditions V. Ya. Basevich, A. A. Belyaev, S. N. Medvedev, S. M. Frolov, and F. S. Frolov . . . . .	30
Deflagration-to-detonation transition in the heterogeneous system “oxygen – liquid <i>n</i> -decane film” I. O. Shamshin, V. S. Aksenov, and S. M. Frolov . . . . .	36
Determination of the values of $\Delta_f H_{298.15}^0$ of $Al_2O_3$ and its clusters $((Al_2O_3)_n)$ with $n = 2$ and 4 G. A. Poskrebyshv and A. N. Ermakov . . . . .	45
The method for determination of solid fuel combustion characteristics in high-speed air flow D. A. Vnuchkov, V. I. Zvegintsev, S. V. Lukashevich, and D. G. Nalivaichenko . . . . .	51
Use of experimentally obtained characteristics of solid fuel combustion for calculating gas-thermodynamic processes in a combustion chamber S. M. Aul’chenko and V. I. Zvegintsev . . . . .	57
Experiments and calculations of pressure drop in a rocket engine combustion chamber at opening of auxiliary nozzles V. N. Marshakov . . . . .	63
Combustion mechanism and thermal decomposition of 4,9-bis(trinitromethyl)-1,2,4-triazolo[3,4-d]-1,2,4-triazolo[3,4-f]-furazano[3,4-b]pyrazine V. P. Sinditskii, T. H. Hoang, and A. B. Sheremetev . . . . .	71
Capability of short-pulse projectile setup operating in low-velocity detonation mode at a model composite propellant B. S. Ermolaev, A. V. Roman’kov, and A. A. Sulimov . . . . .	77
Expansion dynamics of combustion products of mechanoactivated mixtures of aluminum with copper oxide S. Yu. Anan’ev, A. Yu. Dolgoborodov, and B. D. Yankovsky . . . . .	81
Numerical modeling of the combined charge blast inside closed concrete structures with equipment I. G. Novikov, N. F. Svidinskaya, A. V. Svidinsky, S. S. Sokolov, and N. A. Imkhovik . . . . .	86
Anility: Results of industrial tests A. A. Dobrynin, A. M. Abdulganiev, and I. A. Dobrynin . . . . .	92
