

COMBUSTION AND EXPLOSION [GORENIE I VZRYV (MOSKVA)]

Vol. 12 No. 1 Year 2019

Editor-in-Chief S. M. Frolov

In this issue:

On the reactivity of singlet delta oxygen with respect to the simplest hydrocarbons A. S. Sharipov and A. V. Pelevkin	4
Characteristics of combustion of rich methane–air mixtures at elevated pressures I. S. Glukhov, Yu. N. Shebeko, A. Yu. Shebeko, and A. V. Zuban	12
Selective oxycracking of heavier components of natural and associated petroleum gases as a way for production of gas motor fuel A. V. Nikitin, K. Ya. Troshin, A. A. Belyaev, A. V. Arutyunov, A. A. Zakharov, A. A. Kirushin, and V. S. Arutyunov	20
Autoignition of methane–air mixture under intermittent operation of a hollow cylindrical Ni–Al radiant burner A. S. Maznoy and N. S. Pichugin	29
Infrared burner device with high specific power N. Ya. Vasilik and V. M. Shmelev	37
Analysis of the mechanisms of turbulent combustion using calculation data based on the partially stirred reactor model V. V. Vlasenko, A. Yu. Nozdrachev, V. A. Sabelnikov, and A. A. Shiryayeva	43
On the effect of molecular oxygen on combustion of aluminum nanopowder in steam V. B. Storozhev and A. N. Yermakov	58
Catapult launching tests of an unmanned aerial vehicle with a ramjet pulsed-detonation engine S. M. Frolov, V. S. Aksenov, V. S. Ivanov, and I. O. Shamshin, and S. A. Nabatnikov	63
Numerical simulation of the operation process in a diesel engine with the real-gas equation of state S. M. Frolov, V. S. Ivanov, R. R. Tikhvatullina, F. S. Frolov, N. M. Kuznetsov, and B. Basara	73
Numerical simulation of heterogeneous detonation using HLL method for Baer–Nunziato equations P. S. Utkin and Ya. E. Poroshina	84
The mechanism of ignition of double-base propellant at low pressures V. G. Krupkin, V. N. Marshakov, and S. A. Rashkovskiy	90
About convective burning of aluminum powder PAP-2 with water V. E. Khrapovskii and B. S. Ermolaev	100
Experimental study of thermally coupled self-propagating high-temperature synthesis processes in the layered system $\text{Fe}_2\text{O}_3 + 2\text{Al/Ti} + \text{Al}$ A. V. Linde, I. A. Studenikin, A. A. Kondakov, and V. V. Grachev	108
Frame compounds. Energy rearrangements of radicals E. A. Miroshnichenko, T. S. Kon'kova, Yu. N. Matyushin, A. B. Vorob'ev, J. O. Inozemtsev, and A. V. Inozemtsev	116
Influence of aluminum particle size on the heat of explosion of aluminized explosive compositions M. N. Makhov	122
On the mechanical sensitivity of mixtures of explosives with solid particles A. V. Dubovik, N. V. Dmitriev, and V. O. Leontiev	129
Versions of the thermodynamic perturbation theory and the choice of the optimal version for calculations of thermodynamic properties of substances Yu. A. Bogdanova, I. V. Maklashova, and T. D. Tret'yakova	134
