

# COMBUSTION AND EXPLOSION [GORENIE I VZRYV (MOSKVA)]

Vol. 12 No. 2 Year 2019

Editor-in-Chief S. M. Frolov

## In this issue:

Gas-phase kinetics of diborane oxidation in air A. M. Savel'ev, V. A. Savelieva, and N. S. Titova . . . . .	3
Calculation of the standard enthalpy of formation and heat of complete combustion of triethylaluminum in water vapor and in air N. M. Kuznetsov, S. M. Frolov, and P. A. Storozhenko . . . . .	10
Predictive capabilities of the kinetic models of hydrocarbon oxidation for the low- and high-temperature oxidation of <i>n</i> -heptane as an example P. A. Vlasov, V. N. Smirnov, O. B. Ryabikov, G. L. Agafonov, A. R. Akhunyanyov, and N. S. Malyshev . . . . .	14
Pyrolysis and self-ignition kinetics of acetone behind reflected shock waves: An experiment and numerical simulation A. M. Tereza, G. L. Agafonov, S. P. Medvedev, N. V. Nazarova, and V. N. Smirnov . . . . .	25
Copyrolysis of dimethyl ether and methane under pulsed adiabatic compression I. V. Bilera . . . . .	33
Three-dimensional direct numerical simulation of turbulent combustion of hydrogen–air and methane–air mixtures in the field of synthetic turbulence V. Ya. Basevich, A. A. Belyaev, S. N. Medvedev, S. M. Frolov, F. S. Frolov, and B. Basara . . . . .	41
Large-scale dynamics of combustion kernels in ultralean hydrogen–air mixtures in terrestrial gravity conditions V. V. Volodin, V. V. Golub, A. D. Kiverin, K. S. Melnikova, A. Yu. Mikushkin, and I. S. Yakovenko . . . . .	53
On combustion regimes in swirling jets impinging on a flat surface D. K. Sharaborin, R. V. Tolstoguzov, V. M. Dulin, and D. M. Markovich . . . . .	60
The effect of hydrogen peroxide on nitric oxide formation at combustion of the vapor/air/methane mixtures G. A. Poskrebyshch, I. A. Korobeinikova, and V. N. Popov . . . . .	68
The influence of the method of supplying fuel components on the characteristics of a detonation rocket engine V. A. Smetanyuk, S. M. Frolov, V. S. Ivanov, and B. Basara . . . . .	74
Ultimate conditions of burning the magnesium powder in nitrogen–oxygen mixture V. M. Shmelev, V. G. Krupkin, V. M. Nikolaev, and S. V. Finyakov . . . . .	85
Modeling of the diesel-engine operation process with exhaust gas recirculation on the basis of a detailed kinetic mechanism of fuel combustion S. S. Sergeev, S. M. Frolov, V. Ya. Basevich, B. Basara, and P. Priesching . . . . .	92
Estimation of the size of the skin layer in the bottom-hole zone of oil wells N. M. Kuznetsov and Yu. G. Serkin . . . . .	102
Directional regulation of the fire-protective and extinguish efficiency of N–P-containing fire retardants in synthetic and natural polymers V. V. Bogdanova, O. I. Kobets, and O. N. Buraja . . . . .	106
Thermochemical properties of nitrophenyl tetrazoles T. S. Konkova, E. A. Miroshnichenko, Yu. N. Matyushin, A. B. Vorob'ev, J. O. Inozemtsev, A. V. Inozemtsev, O. V. Serushkina, and I. L. Dalinger . . . . .	116
Molecular dynamics simulation of thermal decomposition of organic substances A. V. Kudinov, Yu. A. Bogdanova, and S. A. Gubin . . . . .	121
